Single Arm Backshell Series
Typical applications

Civil Aviation

Military Aviation

Drone

Ground Vehicle

Marine

Rail Transportation
Features & Benefits

**SELF-LOCKING**
High Reliability
SUNBANK has designed and developed high-reliability, self-locking mechanisms to withstand high vibrations.

**LIGHT WEIGHT**
High-End Materials
Lightweight, aerospace grade composite materials that are up to 40% lighter than Aluminum.

**PLATING**
Environmental
Available with electroless nickel plating meeting the requirements of AS85049 and RoHS/REACH compliant.

**GROUNDING**
Solderability
Ground Lug option allows soldering directly to the body.
**Description**
- Self locking coupling
- Ground Lug option with electroless Nickel plating
- Straight, 45° & 90° configurations

---

**Technical features**

**Mechanical**
- **Material**: PEI Aerospace grade
- **Plating**: Electroless Nickel (meets AS85049 requirements and RoHS/REACH compliant)
- **Mechanical Testing**: Meets or exceeds¹ AS85049 Light Duty requirement

**Environmental**
- **Operating temperature**:
  - -65°C to +200°C for plated configurations
  - -65°C to +175°C for unplated configurations
- **Salt spray**: 2000 hours
- **Fluid immersion**: In accordance with AS85409

**Electrical**
- **Electrical continuity**: < 2.5 mΩ

---

**Ground lug option** (available with plated version only)
Omit for no ground lug option

---

¹: Exceeds applies to light duty bend moment criteria only
²: Applies to plated configuration only
## Range overview

- **S** - Straight
- **A** - 45°
- **R** - 90°

Assembly

1: Attach plug connector to receptacle

2: Secure plug connector to receptacle then prepare wire bundle to feed through Single Arm

3: Position Single Arm and apply torque per AS85049 standard with standard hex torque wrench

4: Use a suitable cable tie that is appropriate for the application. Refer to Single Arm datasheet for recommended ties
Why us?

SOURIAU-SUNBANK's single arm product is designed to withstand 50% greater bending moment than standard AS85049 composite options. Our product is up to 40% lighter than Aluminum. Reducing weight will positively impact the overall mass of the electrical system, allowing the aircraft to exert less fuel. We have designed the single arm series to be the strongest of its kind, while also obtaining the maximum weight depletion achievable. **SOURIAU-SUNBANK is fully industrialized to support the complete line of the Single Arm family.** For over 100 years, our company has been servicing the aviation, defense, space, energy, and transportation industries. **SOURIAU-SUNBANK**'s success is attributed to our vast product offering, collaborative engineering, and manufacturing approach to helping our customers with sophisticated and complex designs while offering a universal platform to service all interconnect needs.
